-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1,32, and 45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshida in view of Arellano et al.

Yoshida discloses the use of a percussion instrument lift assembly comprising a support rod (18); two end lifts connected by the support rod (see figure 1), each end lift comprising a frame (7), a lifting frame(9) coupled to the frame; a lift (21) extending between the frame and the lifting frame (19), the lift actuator to move the lifting frame in a vertical direction with respect to the frame; and a first and second platform (14) (see paragraph 33) coupled to the lifting frame and adapted to be selectively moved relative to the lifting frame to accommodate a percussion instrument. Yoshida further discloses the use of vertical tube supporting members(3) that extend between the top and bottom of the frame and an aperture through which the vertical tubes extend (see figure 5) . The bottom of the frame as disclosed by Yoshida also includes a support rod receiving member and castor wheels (16) coupled to the end of the vertical tubes (see figure 5) . The lifting frame as disclosed by Yoshida comprises a mounting aperture to couple the platforms via a fastener (48) .

Yoshida does not disclose the specific use of a platform selectively moved in a horizontal direction.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the device as made to modify the device as disclosed by Yoshida to include the platform as disclosed by Arellano in order to provide a mechanical lift.

Allowable Subject Matter

3. Claims 2-31, 33-44, 46, and 47 allowed.
4. Applicant's arguments with respect to claims 1, 32, and 45 have been considered but are moot in view of the new ground(s) of rejection.
5. Papers related to this application may be submitted to Group 2800 by facsimile transmission. Papers should be faxed to Group 2800 via the PTO 2800 Fax Center at 703-872-9306.
